A copy of a German Office action dated November 11, 1999 and the article reference cited therein are enclosed as well.

As concerns the German-language article reference, the German Examiner made, in English translation, the following statement concerning its pertinence, in the last sentence of the fifth paragraph on page 2 of the German Office action:

As to reference (2) [the article reference] it is added that a catalyst body having a throttle layer for impeding diffusion is by itself known (see in that reference particularly Figure 1).

This Information Disclosure Statement is being submitted before the mailing date of a first Office action on the merits pursuant to 37 C.F.R. 1.97(b)(3).

By submitting an English-language version of the relevant portion of the German Office action the requirement for a concise explanation of relevance of non-English-language references is deemed to be satisfied pursuant to the sentence bridging the two columns on page 600-101 of the Manual of Patent Examining Procedure, Seventh Edition (Revision 1, February 2000).

Since all the requirements of Rules 97 and 98 have been complied with, the Examiner is requested to consider the references on their merit and return a copy of the PTO-1449

Form indicating with his/her initials that the references  
were considered.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Gabor J. Kelemen". The signature is fluid and cursive, with the first name "Gabor" being more prominent.
